

# THINQ 7-9

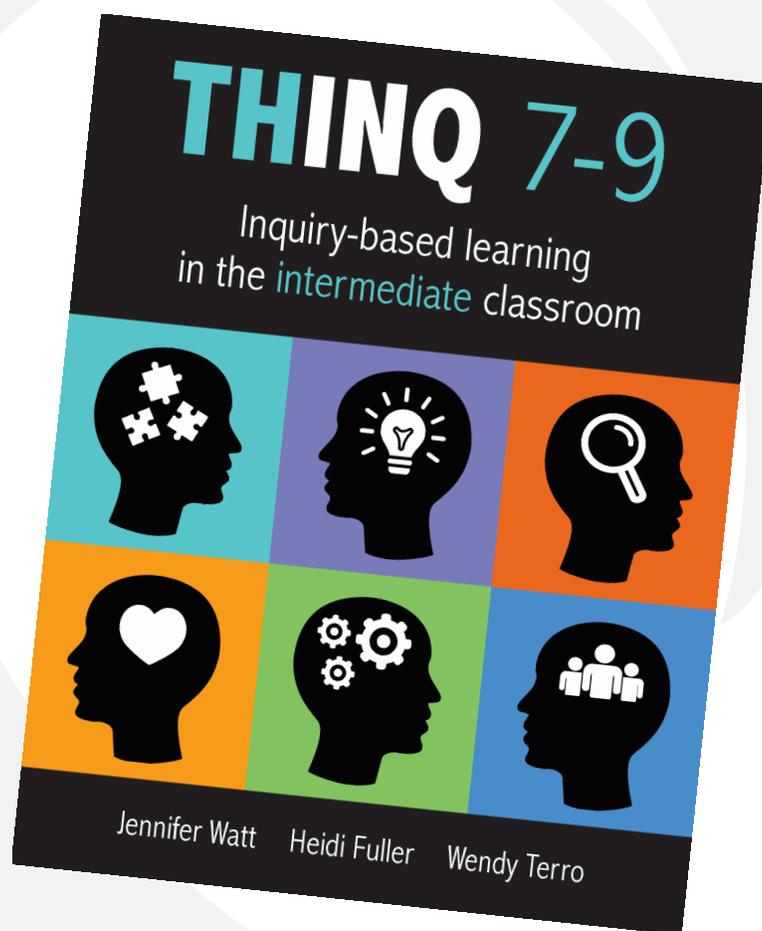

**NEW**  
Intermediate  
inquiry  
resources

THINQ 7-9 examines the role of educators and learners in an inquiry-based intermediate classroom.

- Written by educators, for educators, in a practical, reader-friendly style.
- Focused on the big ideas that underpin all inquiry-based learning experiences.
- Organized around the questions teachers ask about how to do more inquiry.
- Case studies and features illustrate what inquiry looks and sounds like in intermediate classrooms.
- Engaging and easy-to-follow layout, instructional graphics and full colour design.
- Includes over 50 classroom-ready, reproducible backline masters.

## CONTENTS

### **Chapter 1 Getting started: Inquiry-based learning with intermediate learners**

- 1.1 What is inquiry learning?
- 1.2 Why is inquiry a better way to learn?
- 1.3 What are inquiry dispositions?
- 1.4 Is there a standard model or method of inquiry?
- 1.5 What is the intermediate teacher's role in inquiry?
- 1.6 Are inquiry-based learning and intermediate learners a good fit?

### **Chapter 2 Assessment and evaluation: Understanding how our intermediate students are doing**

- 2.1 What is inquiry assessment?
- 2.2 How do I assess what is essential to inquiry along with everything else?
- 2.3 How can we engage intermediate students in assessment?
- 2.4 How do I gather, interpret and respond to assessment evidence?

### **Chapter 3 Wondering and questioning: The essence of inquiry**

- 3.1 How do I create a climate of wonder?
- 3.2 Why do we start with a question?
- 3.3 What makes a good inquiry question?
- 3.4 How can I help students create their own inquiry questions?
- 3.5 What questions can help students reflect on their thinking?
- 3.6 How can I assess questioning?

### **Chapter 4 Investigating and exploring: Finding answers to inquiry questions**

- 4.1 What are some ways of investigating and exploring?
- 4.2 How could bias affect the investigating and exploring stage?
- 4.3 How can I help learners gather information, data and evidence?
- 4.4 How do we determine if a source is accurate, reliable and credible?
- 4.5 How can students organize their notes and keep track of their sources?
- 4.6 How can I assess the investigating and exploring stage?

### **Chapter 5 Making sense: Creating new knowledge and innovative solutions**

- 5.1 What does the "making sense" part of inquiry involve?
- 5.2 How can we help students consolidate their evidence?
- 5.3 What are some simple tools to help students draw conclusions?
- 5.4 How can we help students synthesize?
- 5.5 How can we help students make sense with empathy?
- 5.6 How can students avoid "thinking traps" and instead use "thinking boosts"?

### **Chapter 6 Reflection and sharing: Pushing inquiry to a deeper level**

- 6.1 Why does reflection and sharing matter?
- 6.2 What does effective reflecting and sharing look and sound like?
- 6.3 How do I get students to give and respond to supportive critique?
- 6.4 What are some practical tools to help students reflect and share?

### **Chapter 7 Wrapping it up: What matters most**

- 7.1 What are the big ideas of inquiry?
- 7.2 How do I move forward from here?
